# **Summary**

Finding creative solutions to problems is something I have always enjoyed. As a kid I loved tinkering with things that were broken, figuring out how they worked, and fixing them again. When I finished high school. I knew exactly what I wanted my career to be.

I'm Currently pursuing the under-graduate degree of Information Technology from K.C College of Engineering and Management Studies. I'm intrested in Web Devlopment field and seeking exciting opportunities related to the same.

Being a student I have repeatedly been exposed to new culture and diverse groups of people. This is made me able to quickly adapt to changes and gain a broader perspective. I am always curious about things and enjoy learning. I like to solve problems and fix errors. I am a detail oriented person and I keep my goals and tasks organized to maintain productivity.

I believe that the skills that I have attained from the dynamic environment and competitve university life define me and I am looking forward to implementing and polishing them in any oppurtunity that I receive

# **Experience**

#### **Web Developer**
